Q11. Largest Prime Number (20 marks):

A **Prime Number** is a number that is greater than 1 and has just two factors: itself and 1. Given an integer, N, for $N \ge 2$, a common question is, what is the largest prime number which is not larger than N?

Write a programme to

Input an integer *N*, where $2 \le N \le 10000$.

Output the prime number not larger than *N*.

试题 11. 最大质数 (20 分):

一个**质数**只有两个因数,即该数本身以及 1。给予一个大于或等于 2 的整数 N,一个常问的问题是,不大于 N 的最大质数是何数?

试写一程式以

输入一个整数 N,满足 $2 \le N \le 10000$ 。

输出不大于 N 的最大质数。

Example (例子)

| Input (输入) | Output (输出) |
|------------|-------------|
| 2 | 2 |
| 5678 | 5669 |
| 10000 | 9973 |
